

# NGUYEN QUANG HUY

.Net Developer

I am a software developer with four years of experience in various large and small projects. I have participated in many different complex projects and can work independently or as a key member in a team. I have programming skills in many languages and technologies such as VB.NET, C#, ReactJS, SQL Server, PostgreSQL, Elasticsearch, RabbitMQ. I also have the ability to research and learn new technologies when required or given the opportunity.

## RELEVANT SKILLS

- C#, VB.Net
- ASP.NET Core, Entity Framework
- ReactJS, React TypeScript
- REST API, RESTful API
- RabbitMQ, SignalR, Socket.IO
- SMTP, Elasticsearch
- SQL Server, PostgreSQL
- OOP, MVC, OSI Model
- GitLab, SourceTree, Jenkins

## EDUCATION HISTORY

### Ton Duc Thang University

Software Development: 2018 - 2023

- GPA: 7.68

## LANGUAGE

- English:
  - Aptis ESOL 154 (~ IELTS 5.5)

## WORK EXPERIENCE

### .Net Developer

**StepMedia Software VietNam** (5/2023 to 2/2025)

**Project: Go Food and Beverage**

#### Overview:

- Specialized management software for the F&B industry. Management software designed specifically for the F&B industry, helping restaurant / eatery owners build and optimize the management process of orders, dishes, raw material inventory, staff.

#### Responsibilities:

- Developed and maintained a responsive web application based on User Stories and UI design requirements.
- Implemented REST APIs using .NET Core and C#, ensuring high performance and scalability.
- Optimized API and database performance by tuning queries and reducing processing time.

#### Technologies:

- **Frontend:** ReactJS (Responsive UI for multiple screen).
- **Backend:** RESTful API with C# .NET Core, RabbitMQ, Redis, SignalR, Socket.IO.
- **Architecture & Patterns:** Clean Architecture, Microservices, CQRS, MediatR, Dependency Injection (DI).
- **Database:** SQL Server

### Web Development

**FPT Retail - Q7, HCM**

**Project: MRP Website** (5/2021 - 3/2023)

#### Overview:

- Migrated MRP system from WinForms to a web-based solution.

#### Responsibilities:

- Built React TypeScript frontend and .NET Core 6 APIs.

#### Technologies:

- React, TypeScript, .NET Core 6, PostgreSQL.

## **FPT Retail - Q7, HCM 5/2021 - 3/2023**

### **Project: API Support for Microservices (09/2021 – 12/2022)**

#### **Overview:**

- Developed RESTful APIs for data exchange between SQL Server and external systems, ensuring scalability and performance.

#### **Responsibilities:**

- Built and optimized RESTful APIs using C# .NET.
- Integrated RabbitMQ for order processing and messaging.
- Queried Elasticsearch for fast data retrieval.
- Automated file uploads & data transfers via SMTP.

#### **Technologies:**

- Backend: C# .NET, RESTful API.
- Messaging & Search: RabbitMQ, Elasticsearch.
- Database: SQL Server.

### **Project: Warehouse Booking (10/2022 – 12/2022)**

#### **Overview:**

- Developed a system to process and store order data from RabbitMQ to PostgreSQL.
- Supporting order management and delivery for warehouse staff and suppliers.

#### **Responsibilities:**

- Designed performance metrics screens for supplier orders.
- Implemented order processing, delivery scheduling, and reporting.
- Developed features to assist warehouse employees in inventory management.

#### **Technologies:**

- Backend: NestJS (Node.js).
- Frontend: ReactJS (Ant Design).
- Messaging & Queue: RabbitMQ.
- Database: PostgreSQL.
- ORM & Query Optimization: nestjs/crud.

### **Project: Material Requirements Planning - Due: May 2021 to January 2023.**

#### **Overview:**

- Support company employees in determining product calculation and creating sourcing information.

#### **Responsibilities:**

- Develop a Winform application for ordering and business activities.
- Debug and fixed application issues.

#### **Technologies:**

- UI Design: DevExpress Framework .
- Programming Language: VB.Net.
- Database Queries and CRUD operations: SQL Stored Procedures.
